

ENDPOINT PROTECTION

ANTIVIRUS

Antivirus is now known as Endpoint protection. This is because the software has had to evolve with the higher risks of advanced cyber threats like fileless malware and zero-day attacks

REALTIME

Uses real-time monitoring and deep memory analysis to catch threats that traditional antivirus solutions might miss.

UNIFIED ENDPOINT SECURITY

Consolidates Antivirus, ransomware detection, and rollback/file recovery features within a single, lightweight agent

INDEPENDANT TESTING

An independent study by Miercom highlighted the efficiency of the platform, showing that Datto's EDR and AV solutions achieved a 99.62% malware detection efficacy.
